

## Let our experts make your SQL Server environment as fast as possible

### Leverage our consulting services

- Create an engagement roadmap with our best-in-class-SQL Server Audit
- Select a block of consulting hours for one-time fixes
- Watch our team of Sr. DBAs optimize your environment for speed
- See what has improved with transparent reporting

### Services for ongoing support

- If you need ongoing support, lean on our team of Sr. DBAs to regularly tune your environment
- With Managed SQL Services, we can move beyond short-term fixes and take a more proactive approach
- If you want continuous performance improvements, Managed SQL Services might be the right fit.

## Performance tuning never stops

### Have you been dealing with:

- ✓ Unpredictable or sudden drops in performance
- ✓ CPU running at 100%
- ✓ Queries gradually running slower over time
- ✓ Queries becoming slower post-SQL migration or upgrade
- ✓ Some queries never finishing

### Do you want:

- ✓ Access to a team of experts
- ✓ Reliable performance and better visibility
- ✓ Performance issues identified and solved proactively
- ✓ To understand the root causes of performance issues
- ✓ Architectural evaluations

### Hire Red 9 to:

- ✓ Make SQL Servers as fast as possible
- ✓ Predict performance
- ✓ Increase server capacity
- ✓ Reduce server costs
- ✓ Optimize performance architecture

## Testimonials

### 400% performance improvement

The biggest benefit has been performance gains and tuning from migrating to AWS and a newer version of SQL Server with Always On clustering.

Red9 was integral to this process. Red9's expertise in SQL migration and performance tuning, combined with their deep MSSQL knowledge, has been a huge asset.

Their flexibility and professionalism during a difficult migration were highly appreciated. If you're unsure about choosing Red9 as your SQL Server Support firm, set up a call with one of their experts for a performance assessment. Red identified inefficient indexes and bottlenecks, resulting in a **400% improvement in latency**.

### Impressed with the responsiveness and professionalism

We engaged Red to **troubleshoot ancient SQL databases** that had become a major pain point for our client. Red9 dove in head first, optimizing the databases, auditing the results, and advising on a forward strategy. From the start, it was clear they are **incredibly skilled and knowledgeable**. On top of their aptitude, I've been impressed with their responsiveness and professionalism, which we've come to rely on at Red9.
